Dear Cr McCallum

Priority Coastal Planning and Management Policy Issues

Thank you for your correspondence dated 16 December 2016 to The Nationals WA. As this is a request for party policy, your request has been referred to me for response. In relation to the questions posed in your letter, please see below.

The Nationals WA agree that an appropriate coastal management framework should be adopted. Issues faced in Seabird, Geraldton and other locations around the State with coastal erosion in particular are costly and destructive for local communities. If re-elected, The Nationals WA will work towards an integrated management policy, including examining the establishment of appropriate governing bodies and strategies.

Adoption of any strategy will require appropriate consultation with all affected stakeholders. Therefore, after appropriate consultation, The Nationals WA undertake to ensure coastal management strategies are implemented into the future.

Thank you for your correspondence.

Yours sincerely

JAMES HAYWARD
President
